

Lamaxa Moments

The new slat roof Lamaxa L50

Der SonnenLichtManager

Lamaxa Moments

It's different when it's yours.

Enjoy fun outdoors – with the Lamaxa L50, you can do so the whole year-round. Alongside the Lamaxa L60 and L70, the Lamaxa L50 represents the most attractive protection against sun, wind and rain. It combines comfort, elegance and gives you a new lease on life. For individuality and the most demanding design requirements: Lamaxa L50.

Experience your own personal Lamaxa moment.

My Lamaxa Moment

Values that enrich us

The biggest joy in my life is time with my family. Especially when we're outside. For me, that is pure happiness and I think that's the case for a lot of people. The garden, the fresh air and being together give us strength.

*Slat roof
Lamaxa L50*

*My outdoor space
in a slender design.*

I love the nature in my garden as well as the freedom and independence that you can only really experience properly when you're outdoors. This independence also applies to the weather. With the Lamaxa, we can spend time outdoors every day and make the summer last longer.

I was able to choose whether we wanted our Lamaxa to be free-standing or with a wall connection. As individual equipment we chose a sliding shutter with wooden filling, which provides us with lateral wind protection and stops curious passers-by from peering in.

And when the evening rolls around and everything gets quieter, I can turn on the most fascinating light show created by the LED lighting integrated into the slats. We make sure to have a good wine to go with it, put our feet up, perfect. That's how we enjoy time as a couple.

*Spend the best time
together.*

Lamaxa Technology

Slat roofs redefined.

The Lamaxa L50 is setting new standards in terms of technology, quality, design, equipment and personalisation options.

A special feature is the motor-controlled, pivotable slats. This solution makes for a slender basic design. The slats, just like the entire structure, are constructed of high-grade, powder-coated aluminium with the highest level of stability. Here, WAREMA uses a special surface quality with a fine texture. It is significantly more resistant to external influences such as dirt, dust and scratches.

With the WMS radio remote control, the slats, the lighting, the vertical shading and the radiant heater can be conveniently operated via hand-held transmitter or smartphone with WMS WebControl pro. The weather-dependent positioning of the slats (depending on weather, temperature, solar radiation) can also be fully automated.

Create your own personal retreat with Lamaxa. Choose from our wide range of weather-resistant colour coatings. Expand your Lamaxa, for example with dimmable LED and RGB lighting, with the up to 6m wide vertical GranTex awning, elegant glass, wooden or aluminium sash frames or with warming Design radiant heaters.

-  Flexible sun shading system
-  Wind-stable
-  Protection against rain
-  Protection against snow
-  Automatable
-  Customisable
-  Extendable

reddot winner 2021

1 Colour selection

In accordance with WAREMA Colour World, with many options to choose from and a high-grade fine texture finish, which is more resistant to external influences (dirt, scratches)

2 Sash frames

Wooden and aluminium glass sliding systems and sliding shutters can be manually moved horizontally

3 Design radiant heater

Infrared short wave radiator with tinted glass ceramic

4 LED and RGB lighting

Remote-controllable and dimmable, with direct and/or indirect light all around on up to 4 sides, integrated in the slats or attached to the poles. Indirect RGB lighting with changeable colour moods also possible as an option

5 Vertical protection with fabric

GranTex awning with easyZIP guidance up to 6 m in width precisely fitted into the frame of the slat roof

6 WMS Radio motor in the slat

Flexible operation with WMS WebControl pro using a smartphone or with a WMS Hand-held transmitter

7 Slats

Double-walled, pivotable slats cannot be moved

8 Weather station

Gathers weather data such as wind speed, solar radiation, temperature, precipitation and enables automatic control of the Lamaxa

9 Water drain

Integrated in freely selectable poles

Lamaxa L50

The Features

Experience exclusive Colour Worlds

The WAREMA Colour World is available for all powder-coated aluminium parts such as slats and profiles. WAREMA offers a large selection of powder colours. Choose from the three colour categories "Highlight", "Variation" or "Individual" – always including a high-grade fine texture surface.

Weather station

You can combine your slat roof Lamaxa L50 with the WMS Weather station. This allows the slats of your Lamaxa to tilt automatically depending on the weather situation. You and your product are thus protected, even when the weather suddenly changes.

Elegant wooden and aluminium sliding shutters

Wooden (larch ecru) or aluminium lateral sliding shutters create elegant design accents. The aluminium shutters can be coated to match the frame or in a contrasting colour.

High-grade glass sliding systems

Lateral glass sliding systems (e.g. Solarlux sliding system SL 20e) offer additional transparent protection against wind and cold while maintaining your view out.

Protection profile

The aluminium profile and the construction stand out thanks to the optimal weather protection and also impress with a clean look and lines thanks to the shapely closure between the crossbeam and slat.

Control using a remote control or app

The Lamaxa is operated via the WMS radio system. Upon request, it is possible to operate the Lamaxa via a smartphone, WMS WebControl pro or Amazon Alexa. This means you can conveniently control slats, awnings, lighting, radiant heaters, and much more.

Feel good atmosphere with the design radiant heater

Even if the temperature drops late in the evening, with the infrared short wave radiator (in a colour matching your Lamaxa) with tinted glass ceramic and a power of 2,200 Watts, you can enjoy yourself under your Lamaxa for even longer.

LEDs in the slats

The integrated LED lighting in the slats creates a special mood at dusk.

GranTex with easyZIP guidance

They combine modern design with functional safety. The intelligent lateral guidance guarantees exceptional stability and a firm hold even in strong winds.

High weather resistance and load-bearing capacity

Lamaxa slat roofs have a permissible snow load of max. 50 kg/m² when closed. The full functionality will be available again after the snow has fully melted. They also withstand a load of up to 230 kg/m² in the maximum size of 6.0 x 4.5 m.

All-round dimmable LED lighting

The LED strips can be individually controlled with the WMS dimmer. They can be used horizontally and provide the perfect lighting mood in the evenings as either direct or indirect lighting.

Lamaxa L60 and L70

The premium Lamaxa models

Lamaxa L60 – Moments of freedom

Maximum comfort thanks to fully integrated ZIP awnings in the frame structure

Never miss a moment, enjoy the atmosphere for even longer: with the Lamaxa L60, you not only no longer need to rely on the weather, but you get to experience it in a completely new way - at first hand. Whether it be in sunshine, in wind and rain or even when it's snowing. One room for all occasions.

Lamaxa L70 – Moments of happiness

Enjoy the convertible effect with the completely movable slats

It's almost as if spring comes earlier and summer never ends: with the Lamaxa L70 with reversible and movable slats, you can create a flexible outdoor area with maximum comfort. When the wind picks up, the movable, elegant glass sash frames provide protection and still give you a view out into nature. If the evening sun is causing some glare, the integrated ZIP awnings make sure your time in your garden paradise is undisturbed.

Lamaxa L50

Technical Details

Lamaxa L50 slat

Max. width	4,500 mm
Max. length	6,000 mm
Slats	Slats are pivotable
Drive	WMS Radio motor
Slat or frame colour	Powder-coated in accordance with WAREMA Colour World, fine texture surface quality
Installation	Free-standing, optional wall connection
